## BEACON RED Sponsors the Commsec Track at Hack in the Box, Thailand

Embodying an outcome-orientated mission mindset, BEACON RED is proud to sponsor the Commsec Track at Hack in the Box (HITB) being held from 21-25 August in Phuket, Thailand. A team of the UAE's most transformative cybersecurity leaders will arrive to Phuket to highlight the country's commitment to advanced technologies and thriving digital communities.

"Sponsoring the Commsec Track at HITB is about bringing together the world's most fearless cyber defenders and thought leaders in one place," said Mauricio de Almeida, CEO of BEACON RED. "To face the complex challenges of tomorrow, it is important that next-generation leaders can connect, share experiences, and have the conversations needed to advance our understanding of future threats." He went on to say that the UAE's dedication to pushing the boundaries of technology and innovation continues to drive the knowledge economy on display at HITB.

BEACON RED would like to wish the UAE national team, Shaheen, the best of luck in the Capture the Flag competition during this HITB.
